

Vaccination Services

The U.S. Department of Homeland Security (DHS) requires onsite vaccination services at DHS facilities and operating locations for vaccines that are either Food and Drug Administration (FDA) authorized or have received the FDA Emergency Use Authorization (EUA). Vaccination solutions must be available for all DHS designated locations within the United States, territories and commonwealths. DHS requires flexibility in vaccination options to support current and future Concepts of Operations for vaccination capabilities; therefore, it is the Government's mission critical need to acquire various vaccination solutions. These solutions require the Components to administer the vaccines and complete required vaccination reporting requirements to include any vaccines, syringes, injection needles, equipment required for vaccine administration, equipment to handle any anaphylactic reactions, appropriate cold storage capabilities, and medical waste disposal.

Services include:

- Deployable vaccine services to support DHS in the United States and its outlying areas;
- Vaccination options to meet varied facility and operating locations population(s);
- Additional administrative considerations to accomplish the vaccination operation; and
- Data management and reporting capabilities for all vaccinations.

Key Contract Vehicle Features include but are not limited to the contractor:

- Providing onsite vaccination opportunities for those who lack the access to be vaccinated, protect the health of the DHS Workforce, and ensure DHS can complete its mission to protect the Nation; and,
- Provide vaccinations authorized in connection with a medical evaluation program, medical surveillance program, fitness for duty examination, or authorized medical examination.

Period of Performance (POP):

One-year base, plus four one-year options (2/15/2023 - 3/09/2028) Varies by Contractor

Number of Awardees: 4 (other than small businesses)
