

Standard Qualification Target

Federal Law Enforcement Training Centers (FLETC), on behalf of DHS Headquarters, Office of the Chief Readiness Support Officer (OCRSO) and all participating DHS Components, established a Department-wide printing source to deliver the DHS Standard Qualification Target (DHS-SQT). This initiative provides a cost effective, quality ensured Department contract vehicle for purchasing firearms targets as opposed to utilizing unauthorized non-government sources.

Key Contract Vehicle Features:

- Targets are manufactured to a unified standard that will be validated with initial production runs along with continued periodic testing to ensure that the quality of the target remains consistent over the life of the contract;
- Ensures compliance with FAR 8.800 that dictates sources for printed products;
- Eliminates the need for each Component to develop their own contract vehicle; and,
- Simplifies the acquisition process and facilitates acquisition efficiency across DHS

Period of Performance (POP): Enduring

Number of Awardees: One Small Business
