Subject: RE: USACE Core Drilling Crew / Construction Site

Hi (b)(6)(b)(7)(C),

I agree this should be after the surveys and in the NEPA document. If they can't change the schedule, there's nothing we can do about that.

The spoils should be temporarily stored outside any potential drainage and covered or enclosed and then used as backfill or disposed off-site.

Obviously we need to make sure no other ground disturbing activities occur (i.e. building the concrete washout pits) before the NEPA document gets signed.

Regards,

(b)(6)(b)(7)(C)

(b)(6)(b)(7)(C) I was informed yesterday that the geotechnical work had been scheduled for the prototype area. This should have been cleared with our NEPA doc . Not sure we can do anything at this point. Let me know your thoughts.

Subject: USACE Core Drilling Crew / Construction Site

Update:

- Crew arrived
- Conducted site visit

- Provided safety/security brief
- Identified staging area
- Identified water source
- Crew is marking boring locations (18 each)
- Dig Alert will refresh utility markings tomorrow a.m.
- Drilling rig arrives later today
