JOIN THE CONVERSATION.
BE THE FUTURE OF R&D.

The *National Conversation on Homeland Security Technology* is a series of online and in-person discussions designed to get people talking about how to innovate solutions for the Nation's homeland security challenges.

Who's Talking

Operational users, technologists, entrepreneurs, and the general public.

Why We're Talking

- **Operational users** can clarify capability gaps and provide input on the usefulness of technology that is currently available.

- **Industry & academia** can obtain a better understanding of operational capability gaps and market opportunities, become better connected, and expand partnerships.

- **Government organizations** can take advantage of a new window of opportunity to collaborate, plan ahead, and expand networks.

- **Citizens** can provide insight and ideas on how solutions can best support the pace of daily life.

What We're Talking About

Issues including sensors, wearable technologies for responders, multi-directional situational awareness and decision making, cybersecurity, screening, and community resilience (or, start a discussion on a topic of your own).

You Should Talk, Too!

Join us virtually through the S&T Collaboration Community and National Conversation webinars, or in person at roundtables, townhall meetings, and workshops.

Go to *http://scitech.dhs.gov* for more information!

The National Conversation is intended to bring together **everyone** to play a role in shaping the future of homeland security technology. This means responders, operational users, citizens, academia, and industry. Through online forums and in-person discussions, we will help industry better understand the homeland security market, apply innovation, and create outcomes that will help keep us all safer while minimizing disruption to the pace of daily life.
