2016-OBFO-06749	4/22/2016	(b) (6)	Pursuant to 5 U.S.C. § 552, I am requesting all agency records concerning, naming, or relating to (b) (6) and specifically requesting that the DHS perform a complete and thorough search of all filing systems and locations for all records maintained by the Agency pertaining to (b) (6). Such a search should include, but not be limited to, files and documents captioned in (or whose captions include) my name in the title. The FBI should search the Central Records System, Electronic Surveillance Records (ELSUR), and Electronic Case File (ECF). Further, I specifically request that the Bureau conduct a text search of the ECF to identify all potentially responsive main and cross-reference files. The DHS's search should include 'main' files and 'see references.'

2016-OBFO-16310	8/4/2016	Ball, Ben	OBIM has collected information on the quality of fingerprint submissions to IDENT for many years. As part of the same program, OBIM also tracks the performance of fingerprint devices in the field, which enable it to identify which devices are performing poorly. I would like to request this device-level performance data. The locations of the devices are irrelevant, and do not have to be provided if that is a barrier to release (although that would be interesting from the perspective of device performance in different use case scenarios). If the submitting DHS component is known, I would like that to be listed - I am primarily interested in data from CBP Port of Entry data. I am looking primarily for quantitative data which would indicate the average NIST or NFIQ scores of devices, and how these scores have changed over time. If OBIM can provide these at the device level, that would be ideal. Aggregate numbers are less useful, but better than nothing. Even if it was representative sample of devices that wouldd be useful.
